www.induscancer.com

Head and neck cancer is a significant problem in our country constituting approximately one-third of all cancer burden in India.

The symptoms of head and neck cancer vary according to the site involved. Some general symptoms include mouth ulcer, lump in the neck/jaw/mouth, pain, difficulty in chewing or swallowing, change in voice, ear pain or hearing loss, difficulty in breathing, nasal bleeding, etc.

Factors that can increase the risk of head and neck cancer are tobacco chewing/smoking, paan/gutka chewing, drinking alcohol, and being infected with Human papilloma virus (HPV) etc.

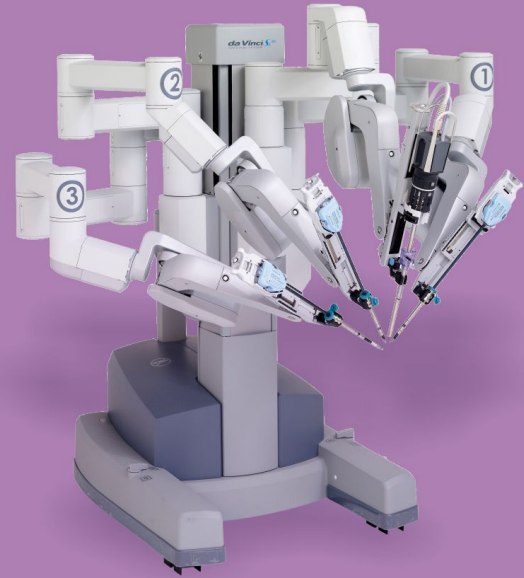

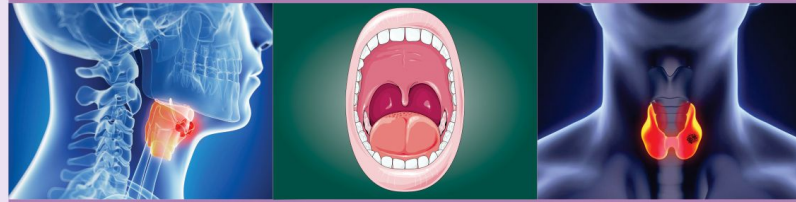

Our team of highly qualified and very well trained oncologists along with the state of the art Diagnostic, Operative and Therapeutic equipment provide comprehensive care as per the latest approved international standards and protocols. The ailments treated by head and neck services are
